DETAILED ACTION

Allowable Subject Matter

Claims 1-17 are allowed.

The following is an examiner's statement of reasons for allowance:

Mehuya et al (U.S. Patent 5,537,432, hereafter '432) and (U.S. Patent 4,868,834, hereafter '834) are cited as pertinent art.

Mehuya '432 teaches a wavelength tunable cavity, comprising a first reflecting unit (col. 9, lines 15-19 and Fig. 15, part 154) adapted to at least partially reflect an incident beam of electromagnetic radiation towards a second reflecting unit (col. 9, lines 15-19 and Fig. 15, part 152), said second reflecting unit configured to at least partially reflect an incident beam of electromagnetic radiation back towards said first reflecting unit, both reflecting units providing the formation of resonance modes of said electromagnetic radiation within said cavity, wherein an optical path of said beam within said cavity is defined in length by said first and second reflecting units (col. 9, lines 15-19), a grating, which is arranged within said optical path of said beam being reflected by said first reflecting unit, said grating being configured for tuning the wavelength of said beam (col. 9, lines 19-21).

'432 does not teach or suggest the second reflecting unit is configured to rotate about an axis by at least 360 degrees and provides a continuous movement of the second reflecting unit along a circle path with respect to the grating, and the circle path of the second reflecting unit comprising at least a portions being arranged to intersect with the beam, which is redirected by the grating.

Fox '832 teaches a wavelength tunable laser cavity with a rotatable second reflecting unit being rotatable about an axis by at least 360 degrees (col. 2, lines 15-21 and Fig. 1, part 22) and the circle path of the second reflecting unit comprising at least a portions being arranged to intersect with the beam, which is redirected by the grating (col. 2, lines 6-8).

Neither Mehuya '432 nor Fox '832 teach nor suggest a reflecting unit being configured to rotate continuously about an axis.

For these reasons, 1-17 are found to be allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
